

QRydeCloud

For Providers

Simplifying Transportation. Energizing Your Business.

Interactive Voice Response (IVR) - no show management will help you reduce no-shows by automating both your in-bound and out-bound call requirements. With this feature, you can identify no-shows earlier and create route alternatives quickly saving time and money.

Features Include:

•IVR Call Out Options

- Daily trip reminder callout
- Call center callout
- Service cancellation callout

•IVR Call In Options

- Trip review
- Trip cancellation
- Standing order renewal

Minimize the Impact of Passenger No-Shows!

No Show Management (IVR)

Do you want to reduce passenger no-shows?

Do you need better customer service?

QRyde can help!

- Reduce no show costs
- Enhance communications
- Reduce slack miles
- Increase vehicle utilization
- Optimize your rerouting process
